RE : LETTER OF RECOMMENDATION FOR LUFTER SDN BHD

Lufter Sdn Bhd was awarded through a tender process for the design, construct and validate a new cGMP/GPP cleanroom Cytotoxic Drug Reconstitute (CDR) facility for Pantai Hospital Kuala Lumpur, Bangsar.

Throughout the entire project, Lufter manage to handle our project team, pharmacy department and engineering department with great confidence and demonstrated satisfaction results in a given timeline.

Lufter's experiences in Pharmaceutical Industry has played a great role in guiding our team to understand the detail needs and compliance towards building this cleanroom.

We believe Lufter with the combination of well-versed engineering background and GMP compliance knowledge, has brought about the success of this CDR cleanroom project.

During the Planned Preventive Maintenance (PPM) we are also satisfied with the quick response of after sales services that Lufter has rendered.

Regards

Ms Lee Seng Dee
Head of Pharmacy Services,
Malaysia Operation Division
