To Who It May Concern

RE : LETTER OF RECOMMENDATION FOR LUFTER SDN BHD

With regards to the above, we would like to take this opportunity to confirm the scope of work performed by LUFTER SDN BHD for our company Premier Milk(Malaya) Sdn Bhd (under F&N Group) to design, construct, commission and validate our existing Positive Filling Canning Room and a new production line Wolvering Filling room. These rooms was designed, commissioned and validated with compliance to HACCP,GMP and ISO clean room standards. They have completed all our project with satisfaction and in return we have engaged Lufter to conduct our Planned Preventive Maintenance (PPM) for more than 2 years since the handover of the project.

The entire project team was led by Simon Loh, who has high technical details especially in HVAC system relation to GMP requirements. They are highly skilled at recognizing very detail installation and high quality of work that is upper most concern for GMP manufacturing plant. The PPM works carried out by them clearly defines the work progress with a weekly report with trouble shooting proposal within a minimum down time of production activity. In general, the service rendered was within our expectation of our quality control results.

In summary, our company is very satisfied with the overall performance of Lufter services. We would recommend them to other related users too.

Soo CW
